Place: N-6.53

Time: Monday 14.30-16.00

Antal Örkény

Research colloquium (Professorial seminar)

Aim of the course

The course aims to introduce first- and second-year students to the basic knowledge of PHD. We will discuss the three-stage higher education model, the position of the PHD in this system, the role of the PhD degree in the academic career, the expectations toward a PhD research and thesis writing, the most important frameworks of writing a dissertation, and the theoretical and methodological aspects required from a PHD research.

Students had to submit a thesis plan to get accepted into the PhD program. The joint discussion of these plans would be the starting point to discuss the most important professional issues related to PhD training and writing of the PhD thesis

Second year students were also invited to the seminar. Their presentation can give an account of what they did in two years, how they went about their studies, what kind of pitfalls they faced, and how do they prepare for the complex exam. These experiences can help new students to be adequately prepared and conscientiously incorporate their academic research work in the PhD program.

Course Description

The first class is dedicated to discussing general questions about PHD.

In the following classes we will listen and discuss the individual student presentations on their thesis plan. Everyone who holds the next presentation needs to upload in advance a background text on the coospace surface. This can be either a background literature or a

result of the research already done. These materials help to discuss the presentation in a substantive way. All students must read these materials before the presentation occur, just to be prepared for the discussions. In each discussion one student must give a critical review on the presentation and the attached material.

Requirements

- Mandatory attendance and active participation in the discussions
- PPT Presentation of the revised research plan
- reviewing someone else dissertation proposal

Literature:

- Umberto Eco: How to write a thesis, MIT press, Cambridge, 2012.

Further readings

- Justus J. Randolph (2009) „A Guide to Writing the Dissertation Literature Review
- Walden University Practical Assessment”, Research & Evaluation, Vol 14, No 13 Page 2
- Howard S. Becker (2008) Writing for Social Scientists: How to Start and Finish Your Thesis, Book, or Article, University of Chicago Press
- Mary Jo Deegan and Michael R. Hill (2012) Doctoral Dissertations as Liminal Journeys of the Self: Betwixt and between in Graduate Sociology Programs Author(s): Mary Jo Deegan and Michael R. Hill Reviewed
- S. Joseph Levine: Writing and Presenting Your Thesis or Dissertation
- How to Write a PhD Thesis, UNSW Sydney (The University of New South Wales)

Sociology Theory II.

The seminar aims at introducing contemporary social theories focusing on the phenomenological and structural transformations of late modernity. Firstly, various aspects of globalization are discussed, including the emergence of ‘network society’ (Castells), ‘liquid modernity’ (Bauman) and ‘precariat’ (Standing). Secondly the transformation of solidarity is discussed according to the tendencies of reification (Honneth), discursive power (Rose) and life politics (Giddens). Thirdly the consequences for modern subject are overviewed including the phenomenological transformations caused by acceleration (Rosa) and information society (Lash).

Grades are based on seminar work and final essay.

1. Introduction
2. Network society (Castells)
 - The information age vol 1. Conclusion pp. 500-510, vol 2. Conclusion pp. 419-429
3. Liquid modernity (Bauman)
 - Liquid modernity. Blackwell 2000. 1-16.o.
4. Precarity (Standing)
 - The Precariat. Bloomsbury Academic 2010. 1-25.o
5. Discussion
6. Reification (Honneth)
 - Reification: a recognition theoretical review
https://tannerlectures.utah.edu/_documents/a-to-z/h/Honneth_2006.pdf
7. Discursive power (Rose)
 - Governing the Soul: The Shaping of the Private Self. London: Free Association Books Preface to 2nd edition vii-xxvii
8. Life politics (Giddens)
 - Modernity and self-identity. pp. 209-232.
9. Discussion
10. Acceleration (Rosa)
 - Social Acceleration: Ethical and Political Consequences of a Desynchronized High-Speed Society in: HIGH-SPEEDSOCIETY SOCIAL ACCELERATION, POWER, AND MODERNITY EDITED BY HARTMUT ROSA AND WILLIAM E. SCHEUERMAN
11. Information society (Lash)
 - The critique of information 1-79.
12. Presentations
13. Presentations

Course description:

The course provides a foundation in classical sociological theory by exploring the works of three major social thinkers: Karl Marx, Émile Durkheim, and Max Weber. We will read and

discuss the most important texts written by these authors. The seminars aim at offering an insight into the major concepts and ideas formulated by these classics as well as the contexts of their formulation. Furthermore, the course will explore their relevance for 21st century social thinking and try to establish links to students' research. The main purpose of the class is to make students familiar with these classics by reading and critically discussing the texts, thereby deepening students' reflective understanding of social theories and concepts. While supporting students in gaining a wider knowledge in the history of sociology, the course also develops their reading, argumentative and presentation skills. All of these will help students prepare for the complex exam in theory.

Requirements:

The most important requirement for the course is to do the assigned reading before each class and to participate in the discussions. To facilitate this process, students will submit a short memo by Friday before the following class. The memo should 1) summarize the major argument of the assigned text, and 2) identify a passage from the text for further discussion. During class, we will discuss students' takes on the major points of the assigned text, and discuss everybody's selected passage.

In addition, students will do two presentations during the semester: 1) a presentation based on independent research/reading of secondary literature related to these authors, 2) a presentation on any theme by these authors linked to students' doctoral research topics. (Help in choosing the presentation topics will be provided to every student.)

1. Enlightenment, Progress, Modernity

- Nicolas de Condorcet, [Introduction] in Sketch for a Historical Picture of the Progress of the Human Mind. (London, 1955 or other editions)
- Adam Smith, Chapters 1-3. (Book I.) in The Wealth of Nations. (several editions)
- Marshall Berman, Introduction: Modernity – Yesterday, Today, and Tomorrow. in All That is Solid Melts into Air: The Experience of Modernity. London: Verso, 1983. 15-36.

2. Early Marx: Philosophy of History, Class, Culture, and Politics

- Karl Marx, Excerpts ('Wages of Labour', 'Profit of Capital', 'Estranged Labour', 'Need, Production and Division of Labour') from the Economic and Philosophical Manuscripts, In Early Writings. London: Penguin, 1992. (or other editions)
