### Oktatás célja:

Our psychology course develops understandings of psychological processes and human behaviour, and provide opportunities to increase your practical skills in communication, group work and critical thinking. We consider essential part of our course perspectives on human diversity and social inclusion

Culture is also an important factor if we want to understand better human beings so we can take a look on psychological functioning through the lens culture (for example individualism/collectivism, religious, ethnic membership and so on).

The course provides opportunities for students to work in small groups and deepen their knowledge on a chosen topic related to the field of Psychology

This is not a practitioner course, it will serve as an introduction to the diverse perspectives, key ideas and concepts, the historical development the theoretical basis of contemporary psychology.
